Guideline and Contract

Laboratory Instructions

1. Be sure to read all fire alarm and safety signs and follow the instructions in the event of an accident or emergency.
2. Ensure you are fully aware of your facility's/building's evacuation procedures.
3. Make sure you know where your lab's safety equipment—including first aid kit(s), fire extinguishers, eye wash stations, and safety showers—is located and how to properly use it.
4. Know emergency phone numbers to use to call for help in case of an emergency.
5. Lab areas containing carcinogens, radioisotopes, biohazards, and lasers should be properly marked with the appropriate warning signs.
6. Open flames should never be used in the laboratory unless you have permission from a qualified supervisor.
7. If there is a fire drill, be sure to turn off all electrical equipment and close all containers. All flammable reagents must be removed before lighting a burner.
8. Never pour water into concentrated acid.
9. Use the fume hoods when toxic or irritating vapours are involved.
10. Always work in properly-ventilated areas.
11. Do not chew gum, drink, or eat while working in the lab. Smoking is prohibited in all center's area.
12. Laboratory glassware should never be utilized as food or beverage containers.
13. Each time you use glassware, be sure to check it for chips and cracks. Notify your lab supervisor of any damaged glassware so it can be properly disposed of.
14. Never use lab equipment that you are not approved or trained by your supervisor to operate.
15. If an instrument or piece of equipment fails during use, or isn't operating properly, report the issue to a technician right away. Never try to repair an equipment problem on your own.
16. Before using any high voltage equipment (voltages above 50Vrms ac and 50V dc), make sure you get permission from your lab supervisor.
17. The student must leave sticky note in the lab to inform other students/researchers not to change the instrument setting/use something within his/her experiment.
18. If you are the last person to leave the lab, make sure to lock all the doors and turn off all ignition sources, all gas, water, vacuum and air valves, switch off splits, fans, and all electrical instruments, air puller fans, lights.
19. Do not work alone in the lab.

20. Never leave an ongoing experiment unattended.
21. Never lift any glassware, solutions, or other types of apparatus above eye level.
22. Never smell or taste chemicals.
23. Do not pipette by mouth.
24. Make sure you always follow the proper procedures for disposing lab waste. Do not pour chemicals down drains. Do NOT utilize the sewer for chemical waste disposal.
25. Report all injuries, accidents, and broken equipment or glass right away, even if the incident seems small or unimportant.
26. If you have been injured, yell out immediately and as loud as you can to ensure you get help.
27. In the event of a chemical splashing into your eye(s) or on your skin, immediately flush the affected area(s) with running water for at least 20 minutes.
28. If you notice any unsafe conditions in the lab, let your supervisor know as soon as possible.
29. Clean up any spill immediately.
30. Take the slide off the stage of your microscope, put the scanning (3X) lens in place, and return your microscope to its proper place in the microscope cabinet.
31. Closed shoes with socks must be worn at ALL times – open-toed shoes, backless shoes, sling backs, clogs, and sandals are not permitted.
32. Always wear gloves when working with unknown substances.
33. Always wear the appropriate breathing masks when working with toxic or irritating vapours.
34. Long hair and loose clothing must be confined while in a laboratory.
35. When working with Bunsen burners, lighted splints, matches, etc., acrylic nails are not allowed.
36. Lab tables and counters are wiped down with 70% alcohol before each lab set up and after completion (Work areas should be kept clean and tidy at all times).
37. Thoroughly wash your hands before leaving the laboratory.
38. It is strictly forbidden to invite or send friends or guests to complete YOUR work
39. Students should use their own materials (test tubes, Petri-dishes, flasks, pipette/micropipette, tips, Eppendorf tubes, para-film, aluminum foil, chemicals, solutions, tools (loops, forceps, droppers, benzene burner, and others), and it is strictly prohibited to use items of his/her colleagues.
40. Student should pay an advance of (300,000 IQD) as a deposit for working in the center and to be re-imbursed upon finishing work in the center if not for his/her services.

Laboratory Usage Agreement:

I have read and agree to observe all laboratory safety rules. I understand these rules are to ensure my own safety, and that of my fellow students, instructors, and staff members. I will cooperate to the fullest extent to maintain a safe laboratory environment. I will follow all written and oral instructions provided by my instructor. I am aware any violation of these rules may result in not being allowed to participate in the laboratory experiment, receiving a failing grade, and/or dismissal from the course.
